

UI/UX DESIGNER

NGUYEN TUYEN THONG

A UI/UX Designer with 4+ years of experience specializing in SaaS, ERP, and E-commerce products. Strong expertise in token-based architecture, multi-brand theming, and scalable component systems within Figma. Proactively integrates AI-powered tools into design workflows, improving overall efficiency by up to 50%. Experienced in driving the end-to-end product design process, from user research and problem definition to developer handoff, within Agile/Scrum environments.

WORK EXPERIENCE

HQSOFT — Senior UI/UX Designer

June 2025 - Present

Design System Leadership

- Led the redesign of the organization's design token architecture, establishing a scalable foundation supporting multi-brand theming and light/dark experiences across 3+ SaaS, ERP, and DMS products.
- Audited and migrated over 200 legacy components into a token-driven ecosystem, significantly improving consistency between design assets and engineering implementation.
- Defined design standards, component guidelines, and documentation practices that streamlined cross-functional collaboration and reduced onboarding friction for designers and developers.
- Partnered with engineering teams to bridge design-to-development gaps through standardized variables, naming conventions, and reusable component strategies.

Product Design — SaaS, ERP, DMS, E-commerce

- Designed end-to-end experiences for enterprise products involving complex operational workflows, including inventory management, approval systems, internal administration, and reporting modules.
- Conducted stakeholder workshops, user interviews, and usability evaluations to uncover pain points and identify opportunities for improving task efficiency and usability.
- Delivered interaction models, high-fidelity prototypes, and implementation-ready specifications to support efficient product delivery cycles.

AI-Driven Workflow

- Incorporated AI-assisted workflows into repetitive design activities, including documentation, content structuring, and early-stage ideation, improving execution efficiency and allowing greater focus on strategic design activities.

Freelance — UI/UX Designer

March 2024 - May 2025

Fastbuy - Mobile App + ERP System

- Led the end-to-end design of a customer-facing mobile application and an internal ERP platform supporting multiple operational functions.
- Simplified complex workflows across six business-critical modules, including CRM, inventory management, pricing, access control, employee administration, and internal information retrieval.
- Collaborated closely with stakeholders to translate business requirements into scalable user experiences, ensuring operational efficiency and reducing workflow complexity.
- Established a unified design system across web and mobile products, improving consistency and maximizing component reusability throughout the ecosystem.

Saudistay - Hotel Booking Platform

- Led the end-to-end UX process for a hotel booking platform targeting the Saudi Arabian market, from discovery and user flow definition to high-fidelity design and prototyping.
- Conducted market and cultural research to adapt experiences to local behaviors, incorporating RTL principles and regional UX expectations into the product experience.
- Balanced international usability standards with local conventions to ensure cultural relevance and accessibility.

MWG (Mobile World Group) — UI/UX Designer

November 2021 – January 2024

Mini-game & Campaign Landing Pages

- Designed responsive campaign experiences for leading brands including Samsung, Xiaomi, and Bobby, supporting marketing initiatives across web and mobile channels.
- Collaborated with marketing, development, and business teams to deliver user experiences aligned with both brand objectives and commercial goals.
- Managed multiple concurrent projects under tight delivery timelines while maintaining usability and visual consistency across platforms.

AVAKids — Design System

- Contributed to the establishment of reusable UI foundations, including custom iconography and scalable component libraries.
- Conducted research into brand perception and target user characteristics to inform design decisions for family-oriented products.
- Supported the development of a maintainable design ecosystem capable of scaling alongside future product initiatives.

Po’s house agency - Intern Designer

January 2021 - April 2021

- Contributed to the development and maintenance of the agency's internal design system.
- Designed user interfaces for new features and landing pages across both web and mobile platforms.

CORE SKILL

UX Process

User Research	Wireframing	Prototyping
Usability Testing	Information Architecture	Developer Handoff
Interaction Design	User Persona	Design Thinking

Design System

Token-based Architecture	Multi-brand Theming	Light/Dark Mode
Component Variants	Auto Layout	Figma Variables

Collaboration

Stakeholder Management	Cross-functional Collaboration	Workshop Facilitation
Requirement Clarification	Agile / Scrum	

Tools

Figma (Advanced)	Adobe Suite	Cursor
Claude	ChatGPT	

EDUCATION

Sai Gon University

2017 - 2021

- Bachelor's Degree, Business of Administration

Keyframe Multimedia

2021

- UI/UX Product Design

LANGUAGE

ENGLISH

- TOIEC 700
